

# omnica ACCESSORY CLAMPS

All Omnica Gadget Bags, except Deluxe models, feature a unique interchangeable spring clamp system. Clamps are available in a wide range of sizes and shapes to accommodate a variety of lenses, finders, magazines, exposure meters, flash units and other accessories. They are constructed of spring steel, and covered with suede to protect the equipment from scratches.

## ADJUSTABLE COMPARTMENT CASES

- Universal models for any camera outfit
- Pre-fitted models for Nikon F, Nikkorex F and Nikkormat Outfits
- Exclusive spring-clamp system
- Unique adjustable front

To call the Omnicase a "gadget bag" may describe its function, but certainly not the quality and detailing which distinguish this bag from all others. In appearance and styling the Omnicase can be compared favorably to fine luggage. In function it combines unmatched versatility with rugged construction and meticulous fitting.

An exclusive interchangeable clamp-system permits the user to tailor-fit the bag for the specific photographic equipment he owns. Not only is each camera, lens and accessory held safely and securely in position, but if the customer should change any of his equipment, he can easily relocate the fittings to suit his new needs.

Another exclusive feature contributing to the ease and convenience of handling, is an adjustable front, for quick accessibility to any item in the bag. A large, outside pocket (not available on the attaché-style case) provides additional space for storing small accessories, such as bulbs and film.
